

Phoenix Swim Club Lightning Policy

- If lightning is shown on the weather bug app to be within 10 miles of our swimming pool, both swimming pools and the pool deck should be cleared of all PSC members. The WeatherBug app on a coach's smartphone must be set to "use current location" for the reading to be accurate.
- PSC members will be asked to wait in a covered area until a decision on the remainder of practice is made.
- The covered areas that are suitable for waiting include: the classroom, swim office, outside the locker rooms (under the building cover), walkways to the facility exit doors. If the swimmer locker rooms are being used as a waiting area, a coach will walk through the locker rooms at regular intervals to ensure the safety of the swimmers.
- Once the lightening has moved outside of the 10-mile range of the pool for 30 mins, practices may resume.
