

USA Swimming timing adjustment change effective May 1, 2016

- There is a significant new timing rule that goes into effect on May 1, 2016.
- In line with FINA rules, USA swimming has decided to drop the requirement to perform adjustment of backup times by calculating the consistent average across the other lanes. This will greatly simplify the determination of back up times.
- Remember that rules are applied on the first day of the meet and used for the duration of that meet, so meets which start in April but finish on May 1st will still need to use the old rule on May 1st.

Lane Malfunction

- 102.24.4D
 - Effective May 1, 2016, back-up times do not need to be adjusted for timing differences.
 - Use button time reported by timing console.
 - Note that Colorado automatically deducts 0.15 seconds but Daktronics does not. Both are acceptable.
 - Use watch time without adjustment.

Time Verification (Pad, Button & Watches) 5/1/16

Electronic Timing TIP:
Calculate the adjusted button average, when the pad is not confirmed & 2 buttons agree, before watch times arrive to speed the process!

Configuring Meet Manager

In Meet Manager 6 the timing adjustment method can be specified in Meet Set-up. (FINA Rules)
