

Unattached Abbreviations To Be Used When Entering Swim Meets

Swimmers may, for many reasons, swim unattached at a meet. It may be because they are in the process of transferring and cannot swim attached for 60 days. Whatever the reason, we must guarantee that the swimmers at a meet correctly report this attachment status.

The team abbreviation in the entry is the key element in this.

To be consistent from meet to meet, the following abbreviations should be used. They should be used in Team Manager, but if an entering club fails to use them, the hosting club can use them in Meet Manager. UN-MN may be used by anyone who wishes to swim unattached and is not associated with any team.

This allows everyone to know which team a swimmer is associated with but still allow the unattached status to be carried into SWIMS, which is the USA Swimming supported database of times.

This table will be maintained by the Times/Age Group Recognition Coordinator.

In Team Manager, the above value is placed in the Team Code and Short Name fields.
