

Autism 101 for Swim Coaches

Autism 101 for Swim Coaches is a webinar designed for aquatics professionals around a simple concept, every child deserves the opportunity to participate in aquatics. This webinar will include an overview of what Autism is, and how it presents to help coaches gain a better understanding of Autism as a Spectrum Disorder. We will be discussing different considerations for inclusion of swimmers with Autism at practice and meets; as well as some evidence-based practices for behavior management and an understanding on how to provide accommodations and supports in an aquatic setting.

12PM THURSDAY, OCTOBER 22, 2020
