## ***Professional Philosophy***

Teaching/coaching is a profession that just not anyone can do. It takes a deep passion for helping others so that they can fulfill their true potential and reach their dreams. As teaches or better yet leaders, I believe, it is our duty and responsibility to find a solution to reach all students through multiple unique and inspirational ways because no two students are alike. My student-athletes are a direct reflection on my teaching and coaching. I explain to my students that I have a very simple philosophy; you can truly do whatever you want through the best investment they will ever make, education.

## ***Employment***

➤ **Tomball Memorial High School** – *Tomball Independent School District*

“Proper fundamentals are necessary to develop good habits. Then we must repeat an act in the proper way in order to form habits that are sound fundamentally. This is called repetition, and repetition is the key to success. Create good solid habits, then repeat them over and over until they become so natural they become second nature. This is the discipline that’s such an integral part of deserving victory. This is the only way to sustain a high level of excellence.”

Coach Rick Pitino

“A wise man once told me that a smart man does not know everything; he just knows where to find the answer.”
