Automatic Times: The automatic times will be calculated with the data from the last 3 years: an average of the 20th place for individuals and the 10th place for relays from the PSYCH SHEET will determine the automatic times. If the average of the times produces a slower automatic time than the current state qualifying time, the automatic time will stay the same. If the average of the times is faster than the current time, the time will be updated to reflect the faster time. Consideration Times: Calculation of consideration times will be calculated by multiplying the confirmed automatic time by 1.14
