

OPERATIONAL RISK REPORT for 4/11/2022

-Report of Occurrence on 03/19/2022

Poor air quality at the Bath YMCA during Winter Champs led to shortness of breath and irritation in the lungs. Jay Morissette put down as the witness. Poor air quality was due to an exhaust fan failure. I personally noticed this too once I started deep breathing, and I had a little cough for several days afterwards.

-Other Updates.

Will be reviewing meet marshal guidelines as USA Swimming moves forward with their meet marshal program.
