

JENNY FLORES MARQUETTE HIGH SCHOOL

Jenny will attend Purdue University in West Lafayette, Indiana. She plans to study Mechanical Engineering and will train with the club swimming program, Boilermaker Swimming. Ironically, she and Mihir may have classes together as IUPUI is a shared program.

Most challenging moment ? My most challenging moments (aside from what is going on right now) was moving from one level to the next. I am not a very social person and I had to learn to adapt to different situations I was not used to experiencing.

My favorite memories of Rockwood? My favorite memories are of when the team would play cards on the sidelines during meets and how we would always have the biggest, most competitive group of players during the 200 breaststroke. I will miss the team and the random tangents our conversations sometimes took while explaining sets.

Favorite practice sets or races? My favorite practices were the ones that involved yoga balls and relays. And I begrudgingly say that my favorite race is the 200 fly because it is proof as to how far I have come since joining Rockwood.

From Jenny - *I want to thank my coaches, especially Mary and Sean, for putting up with my crazy marching band schedule and for helping me be a better swimmer than I ever thought I could be. I also want to thank my parents for driving me to all the meets and practices, even when it meant getting up at ungodly hours, and for being my personal cheer squad from the sidelines.*
