

# Chesterbrook location FAQ

## How will the new structure & programming work at Chesterbrook?

The Chesterbrook location will operate just like any of our other locations. Team practices will start in September in one of the two pools at Chesterbrook and conclude in May each year. During the month of September, the team will practice outdoors. In early October, the new structure will be constructed over the lower pool and the structure will be taken down in late April. For the month of May, the team will practice outdoors again. During all times the team is swimming “outdoors” the pools are heated.

## Is the “structure” a “bubble”?

No, the structure over the pool is not a “bubble”. The structure is a stainless-steel Architectural Membrane Structure. Below are a couple of examples.

## Is the structure heated and have lighting?

Yes, the structure has full HVAC and lighting components.

## Will the team practices be disrupted during the times the structure is going up and down?

No, we are very fortunate that the Chesterbrook location has two (2) competitive pools, and the team will be able to use the other pool, if needed, during construction times.
